

DMYTRO RUDENKO

JAVASCRIPT DEVELOPER

Date of birth: 16.04.1995

Country: Ukraine

ABOUT ME

I'm a full-stack developer with 8 years of coding under my belt. Over the years, I've had the chance to work with a bunch of different languages and technologies, which has helped me build some pretty cool and functional apps. 💻

I've got tons of experience creating websites, building full web apps, and developing backend services using Node.js. I'm comfortable working with both front-end (React, Vue.js) and back-end technologies (SQL, NoSQL), and I love creating smooth, seamless connections between the two. 🌐

When it comes to APIs, cloud deployment, or just making apps run faster and more securely, I'm all in. 🚀 I'm always up for new challenges and interesting projects, and I love collaborating with others to create something awesome. Let's build something cool together! 😊

EXPIRIENCE

CODE BLESSED – 2022–2023

Full Stack Developer: Worked on end-to-end development of web applications with

Firefog Games – 2022–2023

Node.js Backend Developer: Responsible for building scalable backend services for multiplayer games.
